The Details About ClearShield™

The Nature of Glass

Ordinary glass chemically reacts with many salts and minerals found in common tap water. ClearShield™ protected glass is a polymer shield that makes the surface of the glass chemically non-reactive (inert). What this means is that salts and minerals will not chemically react with the glass as they will with unprotected glass. ClearShield™ prevents contaminants from bonding to the glass.

Furthermore, while the salts and minerals will still build up on top of the ClearShield™, the non-stick property means that they buildup only half as fast and are 100% easier to clean. Cleaning is now a very simple task.

Glass Treated With ClearShield™

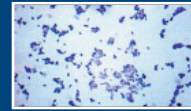

Ordinary Shower Door Glass

Like “Non-Stick” Cookware...

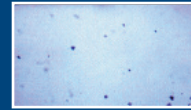

ClearShield™ Low-Maintenance / Easy Clean Glass resists unsightly water spots, minimizes cleaning effort, and keeps shower glass looking like new. It also reduces the growth of bacteria for a more hygienic environment.

ClearShield™ Creates a More Hygienic Environment

Micrograph picture of bacteria adhering to unprotected glass.

Maintaining ClearShield™ Glass with AFTER-CARE Cleaner

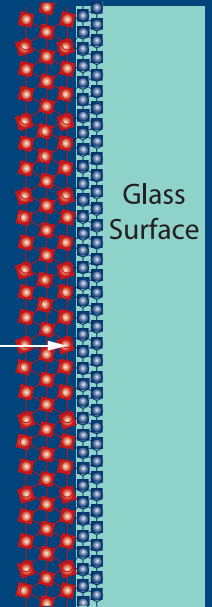

ClearShield™ protected glass is easy to clean and maintain. To prolong the life of ClearShield™ glass treatment, ClearShield™ recommends using *After-Care Cleaner For Shower Glass* to help you keep your shower door glass in pristine condition.

After-Care Cleaner For Shower Glass doubles the life of ClearShield's industry leading performance. ClearShield™ *After-Care Cleaner For Shower Glass* is a non-abrasive cleaner that is specially designed to enhance and rejuvenate ClearShield™ treated glass. It removes soap residue, light lime scale and disinfects the shower door glass.

ClearShield™ Bonds to the Glass...

ClearShield™ forms a strong, multi-molecular bond on the surface of the glass. This unique polymeric resin provides years of proven protection. ClearShield™ creates a non-stick, easy to clean glass surface.

ClearShield™ Chemically Bonds to Glass Surface.
