SESD290 w/ 2 Butresses

SESD290 w/ Notched  
Panel and Butress

## SILHOUETTE ELITE Specification and Ordering Information

### Silhouette 1/4" Swing Door - Model SESD:

- 4 different handle options. Choose from 6" D-Pull, Ladder Pull, Mitered Pull or C-Pull.
- Continuous hinged 1/4" thick glass semi-framless door can hinge left or right (specify for proper logo placement).
- Standard door widths are 24", 26", 28" and 30", with additional sizes ranging from 19" minimum opening to 35 15/16" maximum, sized in increments of 1" full inch with 15/16" adjustment. Clear-Poly drip deflector and sweep is standard.
- Standard heights are 63 1/2", 67", 71", 75 1/2" and 80" tall (1/2" less if installer cuts jambs flush to top of glass).
- Traditional 3 1/2" magnetic catch. Magnetic edge-cap on door latches to strike plate in aluminum latch jamb/filler.  
(SESD aluminum jamb and filler is not compatible with Elite panel option that uses a Clear-Poly latch jamb).
- Over 15 different glass options with five stock and dozens of custom frame colors.

### Silhouette Elite SESD180 and SESD290:

- Standard unit heights are 63 7/8", 67 3/8", 71 3/8", 75 7/8" and 80 3/8" tall (assumes that you flush cut the hinge jamb).
- Elite sidelite panels can be vinyl glazed or wet glazed at no additional charge.
- Elite "Postless" Clear-Poly door latch - Silhouette door latches against the Clear-Poly latch that attaches directly to the edge of the 3/8" sidelite panel. Eliminate the need for bulky aluminum center post and latch!
  - Door uses the same Silhouette magnetic edge-cap that latches to strike plate in Clear-Poly latch.
  - Clear-Poly door latch reduces typical SSD door call out by 1-1/16" as measured from edge of 3/8" sidelite panel. Therefore, if you call-out a 28" door (SSD-28) the distance from the hinge-side wall to the edge of the sidelite panel will be 26 15/16".
- Elite "Headerless" design - This is possible because of strength of the luxurious 3/8" thick glass sidelite panel (flat polished edges). This option requires:
  - Door must hinge off of a wall and must latch against a 180° panel or butress (90° and 135° latches are not available).
  - SESD290 must incorporate 90° sleeve over clamp, HA.2667 (included in kit) or Porta 90° glass clamp, HA.2653 (upgrade option) in order to stabilize butt-joint corner (mitered joint is an upgrade).
  - Panel height and width limitations are due to magnetic latch. Support bars must be added to allow panel size variances.
